

HARSHADA JIJABRAO DESALE

[8767703051] | [ harshadad.jdesale@gmail.com] | [Dhule,
Maharashtra] | [www.linkedin.com/in/harshadadesale22]

About Me:-

Motivated and detail-oriented Master of Computer Applications graduate with a strong foundation in Python programming, Machine Learning, Natural Language Processing, and Web Development. Hands-on experience in developing an emotion-aware depression detection system using BERT, Flask and SHAP for explainable AI. Proficient in building machine learning models, text preprocessing, REST APIs, and responsive web applications. Passionate about solving real-world problems through AI-driven solutions and eager to contribute to innovative software development teams while continuously enhancing technical expertise.

Technical Skills:-

- **Programming Languages:** Python, HTML, CSS, JavaScript
- **Frameworks:** Flask
- **AI/ML:** Machine Learning, NLP, BERT, Transformers, SHAP
- **Tools:** VS Code, Jupyter Notebook
- **Database:** SQL

Education:-

- | | |
|--|--------------------------|
| • Masters of Computer Application [MCA]
SVKM's IoT College, Dhule, DBATU University, Lonere | Pursuing... |
| • Bachelor of Science [BCS]
SSVPS Science College, Dhule, KBC NMU Jalgaon CGPA: 8.42/70.26% Grade: A+ | 06/2021 – 04/2024 |
| • Higher Secondary School [HSC]
S.T.T.K. Mahajan High school and Jr. College, Dhule, Nashik Division Percentage: 74.83% Grade: I | 06/2020 – 03/2021 |
| • Secondary School [SSC]
S.T.T.K. Mahajan High school, Dhule, Nashik Division Percentage: 69.80% Grade: I | 06/2018 – 03/2019 |

Project:-

EmoDetect: An Emotion-Aware Framework for Depression Detection Using Text	10/2025 – 04/2026
--	--------------------------

Developed an AI-powered web application for depression detection by analyzing textual data using Natural Language Processing (NLP) and a BERT-based transformer model. The project involved text preprocessing, tokenization, and transformer-based text classification to accurately identify depression-related patterns. To improve model transparency and interpretability, SHAP (SHapley Additive exPlanations) was integrated to visualize the words influencing prediction outcomes. The application was implemented with a responsive frontend and a Flask-based backend, enabling real-time text analysis and prediction through REST APIs while delivering confidence scores and explainable results.

Certifications: -

- **C Language** - Savitribai Phule, Pune University [11/2022]
- **GCC – TBC English 30** – MSCE, Pune [10/2022]
- **Python Full Stack Development** – JASON [12/2023]
